

WFO CTP (State College PA) Climate Web Page Transition Information

The National Weather Service is implementing new standards of design and content for its climate web pages across the nation, in order to ease customer access and service, much like the standard design of the Weather Forecast Office home pages. This change will take place in the NWS Eastern Region on [Sept. 26, 2005](#).

In order to ensure a smooth transition, a template has been developed that will enable customers to find information on the new web pages, based on where it was found on the old web pages. In addition, customers will be pointed to new climate information from a variety of sources that was not available on the old climate web pages. To use this template, customers should read down the left column to find the climate category they are interested in, then check the right column to see where that information is now located.

Old climate web page	 WFO CTP climate web page
Map of Locations Not Previously Available	<p>WFO CTP Climate home page contains a map of the primary climate sites the Central PA Forecast Office is responsible for: Williamsport, PA, and Harrisburg, PA.</p>

Regional Climate Center

The screenshot shows the NOAA Regional Climate Center website. At the top, there is a navigation bar with five tabs: "Observed Weather", "Climate Prediction", "Climate Resources", "Local Information", and "Astronomical". The "Climate Resources" tab is selected and highlighted with a red circle. Below the navigation bar, the page title "Climate Resources" is displayed. The main content area is divided into three sections: "Climate Information Outside the Local Office Area", "National Climate Information", and "International Climate Information". In the "Climate Information Outside the Local Office Area" section, there is a list of links. The link "Regional Climate Centers" is circled in red, and a red arrow points from the "Climate Resources" tab to this link. Other links in this section include "Climate Pages for other NWS Forecast Offices around the nation", "National Climate Data Center", "Western Regional Climate Center", and "Storm Events Database". The "National Climate Information" section contains links to "National Temperature and Precipitation Summary for Selected Cities", "National Operational Hydrologic Remote Sensing Center", "NOAA's Climate Page", "National Climatic Data Center", "U.S. Climate at a Glance", "Climate Prediction Center", "CDC Interactive Climate Pages", "NOAA's El Niño Page", "NOAA's La Niña Page", "NOAA's Drought Monitoring Page", "NOAA's Storm Event Archives", and "U.S. Hazards Assessments". The "International Climate Information" section contains links to "World Meteorological Organization", "World Climate", "Global Climate Extremes", "Global Climate Change", and "Global Climate Observing System".
